

The secrets to enhancing employee experiences

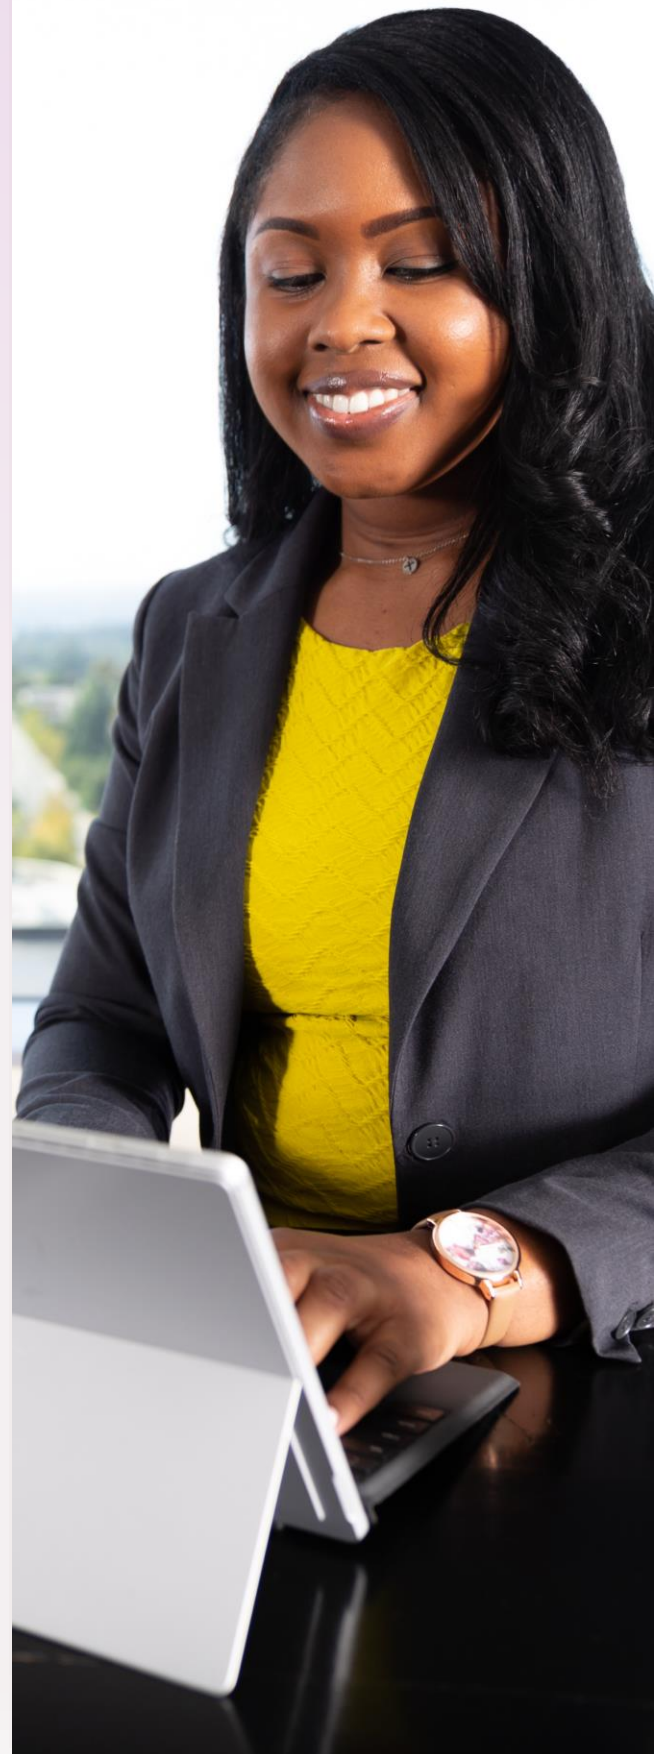

Staying ahead of the competition requires attracting and retaining top talent to drive faster innovation.

Businesses must invest in modern solutions that establish their position as a leading employer and enable employees to be more productive. In a 2022 survey, it was reported that low-code platform or apps have led to an 83% positive impact on work satisfaction.¹ As a leading solution provider, **EIGO USA** has seen that implementing Power Platform helps enhance employee experiences to drive innovative outcomes.

Let's look at the **top three** use cases with the most business impacts

- [Connect your internal and external data sources](#)
- [Improve communication, focus, and collaboration](#)
- [Simplify work with applications and automations](#)

1. "Low-Code Trend Report 2022: Building a learning culture on a low-code platform," Microsoft, 2022

Connect your internal and external data sources

Employees spend too much time searching for data and information in multiple disconnected systems.

Not only does this impact employee efficiency, but it also jeopardizes data integrity when information is entered manually multiple times in different systems, opening up the risk of inadvertent errors.

The average employee spends 3.6 hours daily searching for information. IT employees spend half their day looking for relevant information.²

EIGO USA handles the complexities of migrating data to Power Platform as companies revamp their legacy functions and processes. As the need for additional solutions arises, we can help implement out-of-the-box and custom connectors to create a single version of the truth across all business functions.

2. ""Report: Employees spend 3.6 hours each day searching for info, increasing burnout", VentureBeat, 2022

Improve communication, focus, and collaboration

Over the last several years, the workforce has become increasingly more hybrid, creating a dependence on modern digital collaboration tools.

With hybrid work here to stay, seamless communication and collaboration are crucial to establishing a high-functioning organization.

**Reduce
errors from
7% - 0%**

T-Mobile has been able to process 11x more requests in real-time and reduce errors from 7% to 0% with robotic process automation (RPA) capabilities in Power Automate.

EIGO USA works with businesses to identify the routine tasks in apps like Excel, Outlook, and SharePoint that can be automated with Power Automate. Additionally, apps and bots can be used to improve the flow of work and collaboration in Microsoft Teams and Microsoft 365 apps. As a Microsoft partner, we have the expertise to connect and integrate apps to build connected and streamlined solutions.

Simplify work with applications and automations

Manual work accounts for nearly an entire workday a week for frontline and in-office employees.

These tasks include repetitive, unautomated workflows, app switching, searching for information, and sifting through data. Low-code platforms can automate these tasks to revolutionize employee productivity.

55% of managers spend 8 hours a week on manual, repetitive tasks.³

EIGO USA offers ongoing training and support to train all users on how to leverage Dataverse with Power Apps, regardless of their coding experience. Employees can use Dataverse with Power Apps to build model-driven apps without an extensive coding background. For example, Dataverse can automate mundane tasks like sending emails to free up valuable time.

3. "Time to Automate: Managers Are Losing 8 Hours Per Week to Manual Tasks," Recruiter

Take the first step to a more agile future

Looking ahead, we are fully equipped to partner with enterprise businesses planning their digital transformations to improve employee experiences.

EIGO USA will continue to be a trusted resource to learn how Microsoft solutions can help organizations like yours support their teams to be more productive with modern digital solutions.

For more information about how **EIGO USA** can help you implement the right solution for your business.
